DBA Comfort First Products

Comfort First Products is dedicated to employee safety and comfort. We design and sell HVAC products to enhance employee's health and safety by using highly efficient filters to prevent illness and allergies from overhead air vents due to polluted ductwork. **If you don't filter the air your lungs will.** Thermal Comfort is attained by preventing cold or hot air from blowing onto employees, causing complaints and potential lawsuits.

Capabilities/Values

Many hospitals and medical facilities need additional air filtration when the air enters the workspace. **We offer both a MERV 12 and a MERV 14 filters for our Comfort First Filtered Diffuser.** Also ideal for labs and other facilities that need a clean and draft free environment! **You can save energy too!**

Our products are **value added**. They prevent cold and hot air drafts from overhead air diffusers blowing onto workers below, causing illness and allergies from ductwork pollution contained in that air. Cleaning existing ductwork is impossible at times and prohibitively expensive. By filtering the supply air, you can prevent ductwork pollution that has been building over decades from entering the workspace. **This pollution can contain dust, viruses, bacteria, mold, pollen and more, so by filtering the air you can protect employees from illness or allergy attacks.**

Products

Comfort First Filtered Diffuser - Powder coated steel 2' x 2' supply air diffuser, with MERV 12 or MERV 14 filters improves indoor air quality. Also, the 4-way adjustable directional air flow eliminates air draft complaints and improves office comfort. It replaces an existing supply diffuser or can be specified in new buildings.

Control-A-Flow Draft Eliminator - Eliminates drafts from overhead air vents by re-directing the air along the ceiling line, preventing employee discomfort and complaints. It easily clips onto a conventional T-bar grid in seconds. It's the perfect solution to improve office comfort without calling an HVAC professional. Comes with or without an Aegis Anti-Microbial Filter killing germs on contact.

Facilities and Equipment

Our office and warehouse are in **Lake Elsinore, California**. We distribute the **Comfort First Filtered Diffuser** that is manufactured to our patent specifications. We assemble and distribute our patented **Control-A-Flow Draft Eliminator and Breathe Easy** from this location.

Expertise

We have over 25 years of experience working with the HVAC industry (Heating, Ventilation, Air Conditioning). Our staff will be able to help you find the best solution to your HVAC Diffuser needs.

Retail Customers

Lawrence Livermore Labs, Ivoclar Vivadent, Brookdale Hospital, Stanford, Camp Lejeune Naval Hospital, Abbott Labs, Oak Ridge National Laboratory, Yale University, Stanford, University of Mass Health Services.
